

ORTHOTIC TECHNOLOGY

ReAlign custom offers practitioners the optimum in prefabricated Orthotic Technology.

The Re-align range of orthotics offers practitioners the optimum in prefabricated orthotic technology. They are a tri-density construction that allows for customized prescription. They provide re-alignment of the foot and lower limb. The range consists of 3 main core product types.

- **RE-ALIGN (Sports)** The specifically designed coloured polypropylene shell combines ideally with a (60 shore A) rear-foot post and (40 shore A) inner longitudinal arch filler. This unique product is available in men's, women's and children's sizes, offering a rare 24 sizes in all from children's size 11 to men's size 13.

- **RE-ALIGN (ultra-flex)** The opaque polypropylene shell is of flexible construction that combines with a (35 shore A) blue and white swirl one piece EVA with heel and inner longitudinal arch filler. This product was designed and fabricated at the request of Podiatrist in Australia seeking a stable, supportive but still flexible polypropylene based prefabricated orthoses. The realign ultra-flex is available in men's and women's sizes, offering 8 sizes in all.

- **RE-ALIGN (standard)** The opaque polypropylene shell is of flexible construction that combines with a (35 shore A) blue and white swirl one piece EVA heel post. The realign standard is available in 4 children's sizes.
