

Realign orthotics offer practitioners the optimum in prefabricated orthotic technology. They are a multi-density construction that allow for customised prescription providing alignment of the foot and lower limb

CUSTOMISED PRESCRIPTION

Allows for modification to cater for patient's needs. Easy to grind polypropylene shell, EVA heel post and arch filler

SUPPORT

14mm heel cup height helps stabilise the heel for maximum support

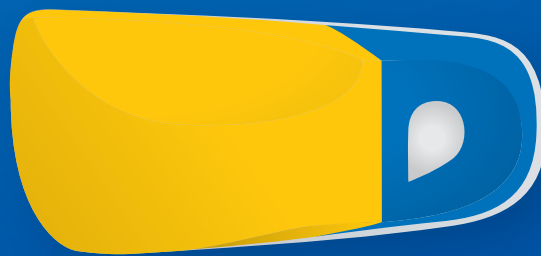

TRI DENSITY CONSTRUCTION

Flexible polypropylene orthotic shell combines with EVA 400 rear-foot post and EVA 260 contoured arch filler for optimum support and stability

CUSHIONING

Full length 3mm neoprene top cover for shock absorption and moisture wicking

Mens					6 - 7	8 - 9	10 - 11	12 - 13
